PROFILE

Full-Stack Developer with experience building practical web applications using React, TypeScript, and Laravel. Experienced in developing responsive user interfaces, backend functionality, REST APIs, relational databases, authentication, validation, and persistent application state. Seeking my first professional software development role.

TECHNICAL SKILLS

Frontend: React, TypeScript, JavaScript, Next.js, HTML, CSS, Tailwind CSS

Backend: PHP, Laravel, Inertia.js

Database: PostgreSQL, Firestore

Tools: Git, GitHub, Docker, Vite, Firebase

PROJECTS

Kanban Task Management

Laravel · Inertia.js · React · TypeScript · PostgreSQL · Tailwind CSS · dnd-kit · Docker

- Built a full-stack Kanban application with persistent boards, columns, tasks, and subtasks using Laravel and PostgreSQL.
- Implemented drag-and-drop task management with persistent ordering and server-side state synchronization.
- Implemented authentication, authorization, and server-side validation across the application.
- Containerized the application with Docker and deployed it to Render.

Audiophile E-commerce Website

React · React Router · Tailwind CSS

- Built a responsive e-commerce SPA with React, featuring product browsing, category navigation, and reusable UI components.
- Implemented shopping cart functionality and checkout form validation to support the complete shopping flow.
- Designed responsive layouts for mobile, tablet, and desktop screen sizes using Tailwind CSS.

REST Countries API

Next.js · REST API · CSS Modules

- Built a responsive country information application with API integration, search, regional filtering, client-side routing, and detailed country pages.
